Four Pillars of *Tallis* Climate Action 25-26

Through the establishment of Sustainability Working group, we will work across four pillars of Climate Action.

1 *Decarbonisation:* Reduce emissions and support pupils to be part of transition to net zero

Strategy: Improve waste recycling provision onsite

Actions:

- Embedding of waste monitoring programme (as agreed with Circular Tools programme)
- Review of G4S recycling policy and procedures
- Reduce/Reuse campaign
- Explore use of recycled paper

Strategy: Develop green suppliers list

Actions:

- Review suppliers and contractors for sustainability measures

2 *Adaptation and resilience:* Adapt buildings and systems to prepare for the effects of climate change

Strategy: Reduce impact of extreme weather in school building

Actions:

- Extreme weather plans to be produced and distributed

Strategy: Implement lights off/power off culture

Actions:

- Audit of PIR capability in school
- Develop comms strategy to raise awareness

3 *Biodiversity:* Enhance biodiversity, improve air quality and increase access to, and connection with, nature

Strategy: Participate in development of Kidbrooke Park Green Corridor

Actions:

- Partner with RBG, Durkan and Groundwork to develop strategy

Strategy: Develop programme to provide produce from school garden to be used in food tech and by Caterlink

Actions:

- Audit of produce available from garden
- Plan produced with DT and Caterlink of what can be used and when

Strategy: Carry out habitat mapping across school site

Actions:

- Develop plan based on habitat mapping to inform planting strategy

4 *Climate Education & Green skills:* Prepare students for a world impacted by climate change through education and practice

Strategy: Develop cross curricular sustainability agenda

Actions:

- Carry out curriculum mapping to establish baseline of sustainability education provision

Strategy: Develop green careers information sharing strategy

Actions:

- Plan community day focus on green careers
