

Living with Covid

We are transitioning to Living With Covid, in line with the Government's objective to manage Covid 19 like other respiratory illnesses.

We are encouraging staff and students to:

- a) Get Vaccinated
- b) Stay at home if they feel too unwell to come to school or work
- c) Take a test if they have Covid 19 symptoms and stay at home and avoid contact with others if they test positive
- d) Wash hands frequently and follow advice to 'Catch it, Bin it, Kill it'

We are advising staff and students who test positive to stay at home for:

5 days (adults)

3 days (students)

There is no need to stay at home if a member of the household tests positive, but household members should be vigilant for any Covid 19 symptoms.
