14 June 2017

Dear Parents and Carers

I am writing to let you know that in the week beginning Wednesday 28 June, Year 10 science students will sit their 'end of Year 10 mock exam' in the sports hall at 9.00 am. This is part of the 'mocks week' starting on Monday 26 June that the school is running.

The assessment will consist of one exam 1hr 30mins long. It will have 3 sections: biology, chemistry and physics.

To support the students, we will be revising in lessons. However, it would be useful if the students did some revision at home using their revision guides. The relevant page numbers are:

Chemistry: atomic structure, structure and bonding, chemical changes p.8-43

Physics: Particle Model of Matter p.84-85, Energy p.26-29, Electricity p.54-65

Biology: Cells p.8-17, Organisation p.16-25,

Reading the relevant pages and doing the questions on the page numbers above is recommended.

The test result will be used to help finalise any setting changes into Year 11. We are keen to be absolutely sure that the students are following the most suitable pathway that matches their ability in Year 11. This will either be triple science, double science higher tier or double science foundation tier. If you have any queries, please do not hesitate to contact me at the school.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Andrew Smythe', written in a cursive style.

Andrew Smythe
Director of Science
