ETHICAL LEADERSHIP

1. Thomas Tallis School Plan 2020-23 has five aims.

1	A powerful curriculum
2	The best teachers
3	Great learning and progress
4	Excellent personal development
5	A model for a better world

As part of aim 5 Thomas Tallis School has adopted the *Framework for Ethical Leadership in Education*. This means that we try to behave in a principled and correct manner in everything we do. Schools and colleges serve children and young people and help them grow into fulfilled and valued citizens. As role models for the young, how we behave as leaders is as important as what we do. We therefore behave with **selflessness, integrity, objectivity, accountability, openness, honesty and leadership**. We demonstrate **trust, wisdom, kindness, justice, service, courage and optimism**.

This policy applies to teaching staff. Non-teaching colleagues' professional development is overseen by their line leaders.

Every teacher needs to improve, not because they are not good enough, but because they can be even better.

- Dylan William

Research shows that powerful continuing professional development helps students succeed and teachers thrive. At Thomas Tallis, we value the contributions of all members of staff and want to support and guide colleagues through the different stages of their career.

This Teachers' Professional Development policy draws from the DfE's [Standard for teachers' professional development](#)¹ and recommendations from the Teacher Development Trust's [Developing Great Teaching](#) report (2015).²

The Standard for teachers' professional development should be used by everyone working in, and with, schools to raise expectations for professional development, to focus on achieving the greatest improvement in pupil outcomes, and to develop teachers as respected members of the profession.³ There are five parts to the standard, which all need to be acted upon together to ensure effective professional development:

1. Professional development should have a focus on improving and evaluating pupil outcomes.
 2. Professional development should be underpinned by robust evidence and expertise.
 3. Professional development should include collaboration and expert challenge.
 4. Professional development programmes should be sustained over time.
- And all this is underpinned by, and requires that:
5. Professional development must be prioritised by school leadership.⁴

Meanwhile, the best available research⁵ suggests that successful professional development programmes display alignment between their design, structure and the pedagogic processes being promoted, and suggests that the design of effective professional development should consider the following elements:

- **Duration:** the most effective professional development lasts at least 2 terms - more usually a year (or longer).

¹ Department for Education. Standard for teachers' professional development. Crown copyright July 2016.

² Cordingley, P., Higgins, S., Greany, T., Buckler, N., Coles-Jordan, D., Crisp, B., Saunders, L., Coe, R. Developing Great Teaching: Lessons from the international reviews into effective professional development. Teacher Development Trust. 2015.

³ Department for Education. [Standard for teachers' professional development: Implementation guidance for school leaders, teachers, and organisations that offer professional development for teachers](#). Crown copyright July 2016. DFE-00167-2016.

⁴ *ibid.*, p.6

⁵ Cordingley et al., (2015).

- **Rhythm:** it is important that professional development programmes create a 'rhythm' of follow-up, consolidation and support activities.
- **Design** for participants' needs: creating an overt relevance of the content to its participants - their day-to-day experiences with, and aspirations for, their students.
- **Creating a shared sense of purpose:** achieving a shared sense of purpose during professional development is an important factor for success. Whether teachers were conscripted or had volunteered to take part in an activity did not appear to be a highly significant factor – a positive professional learning environment, sufficient time, and a consistency with participants' wider context were all more important.
- **Alignment:** No single particular type of activity – or configurations of multiple activities – was shown to be universally effective or crucial to success. What matters is a logical thread between the various components of the programme, and creating opportunities for teacher learning that are consistent with the principles of the student learning being promoted.
- **Content:** Professional development programmes must consider both subject knowledge and subject-specific pedagogy in order to achieve their full potential. Input should allow for the consideration of participants' existing theories, beliefs and practice, and for opportunities to challenge these in a non-threatening way.
- **Providers of professional development:** Facilitators of the most successful programmes act as coaches and/or mentors to participants.
- **Collaboration:** There is evidence to suggest that access to some form of collegial support for problem solving is essential. Where using collaborative approaches, schools should allow participants to engage in collegial problem solving approaches that are focused on improving student outcomes.

Opportunities for career progression

The school has a lot of expertise available to all members of staff as required and requested. Some of the things available are:

- coaching – with opportunities to become coaches, or to be coached;
- observing colleagues – whether in their own subject or across the school;
- opportunities to undertake training – such as the Prince's Teaching Institute CPD sessions, or other types of training with different organisations;
- working with partner schools – whether Primary or Secondary;
- mentoring NQTs and trainee teachers;
- opportunities to deliver and attend training sessions (including BSL);
- support in meeting Performance Management targets;
- the conducting of Research & Development;
- and opportunities to gain Lead Practitioner accreditation.

The below menu indicates suggested and recommended professional development opportunities for members of staff at different stages of their careers. Please note that it is not exhaustive, and we welcome enquires about other developmental opportunities.

Any queries about professional development should be addressed to Jon Curtis-Brignell. All applications for Training and Development must be submitted using the Training and Development Application Form on SharePoint a minimum of 4 weeks prior to the date of the intended development. They will be responded to within 2 weeks.

Continuing Professional Development 2020-21

Our aim is to ensure that the structure of our school timetable best supports teachers to consistently improve their practice. We have an early finish every two weeks to create more time for training and development.

We want to make sure that we use this time to best support the needs of the school, identified as follows:

- Improving teaching and learning, so that there is an impact on teaching effectiveness and student achievement
- Supporting teacher workload, so that there is an impact on teacher wellbeing, recruitment and retention.

Evidence suggests that the most effective CPD programmes:

- Are sustained and iterative, focusing on fewer priorities and taking time on each;
- Establish a rhythm of improvement and learning;
- Focus on what students need and how teachers can develop to achieve this;
- Allow sufficient time, alongside high quality expertise and facilitation, in an atmosphere of trust and respect;
- Ensure that all staff are connected to the latest practice

Following continuing evaluation, the structure of this year's CPD programme will remain largely similar: School→Subject→Teacher.

Each half-term:

- Session 1 – whole-school CPD
 - Session 2 – curriculum-led CPD
 - Session 3 – personal CPD (Research & Development)
1. The primary finding of the Developing Great Teaching report referred to above is that to be effective in producing profound, lasting change, professional development interventions had to be prolonged. The most effective professional development lasted at least 2 terms - more usually a year (or longer). We are therefore aiming to offer cogent, consistent and coherent programmes of support and engagement.
 2. According to the review, professional development and learning should consider the importance of focussing on both generic and subject-specific pedagogy. It is therefore important to consider how subject expertise can be developed alongside more generic aspects. Hence, we have offered curriculum areas the opportunity to introduce their own models for developing subject-specific pedagogy and expertise (PCK).

Whole-school CPD

Must be informed by the school plan and priorities. These are:

	Aim	Objectives
1	A powerful curriculum	a. broad and balanced curriculum
		b. powerful knowledge
		c. curriculum committed to global justice, fairness and sustainability.
2	The best teachers	a. recruit, retain and train the best quality teachers with strong subject knowledge
		b. Monitoring teacher workload
		c. update Tallis Praxis
3	Great learning and progress	a. Tallis Habits
		b. GCSE P8 score to 0+
		c. maintain ALPS 2
		d. adaptive teaching
		e. whole-school expectations literacy and numeracy.
		f. improve engagement in independent learning
		g. improve boys' achievement
5	A model for a better world.	a. To embed the <i>Framework for Ethical Leadership in Education</i> in all our work
		b. To fulfil the public sector equality duty and ensure fairness and equality in all our activities
		c. Sustainability
		d. To learn from lockdown so that future closures may be easier to manage better

Curriculum-led CPD

Has been designed by curriculum / subject leaders. The methodology of curriculum-led CPD should be one of ongoing collaboration, planning and assessment within departments, the focus of which is on improving and sharing teaching knowledge and practice in direct response to student needs.

Signature pedagogies and the subject community

In order to build a culture which allows for academic conversations and a subject specific approach to curriculum, we need to build subject-based communities of practice to set, secure and sustain high quality subject-specific teaching and learning.

Drawing from the work of Christine Counsell, there are three key dimensions to the idea of a subject community at work:

1. A way of being a teacher: an orientation to the whole subject field and its communities
2. Subject communities of teachers creating and sustaining curricula
3. Subject communities of teachers using and producing research

What might this look like on the ground?

- Curriculum mapping and reviews
- Assessment mapping and test design
- Expert debates and subject presentations
- Department focus: subject knowledge
- A shift in the types of conversation happening within schools

Intended impact of subject communities

- Sharing of subject expertise
- Impact in the classroom - higher quality resources, more effective use of time
- Developing better subject and pedagogical expertise
- Teachers feel empowered and see that their expertise is valued
- Space to re-invigorate their passion for their subject
- Positive impact on student outcomes

Subject communities and curriculum CPD

Curriculum CPD should be devoted to:

- a) The development of subject knowledge
- b) Subject specific discussion, planning and pedagogy (not admin)
- c) Applying and embedding research about the psychology of memory within subject areas
- d) Curriculum and assessment design

Planning should take place over the medium- to long- term. It is the curricular thinking that sits behind the resources that matters. When time is spent on curricular thinking, it seems less important to spend time on resources.

E.g. What do I want my students to learn about x? How is knowledge of x structured? What are the core concepts concerning x? What are helpful illustrations of x? What kinds of example are helpful for understanding x? What sorts of questions do I want students to be able to answer about x? What kinds of misconceptions might students have about x?

For full details of your curriculum-led CPD programme, please speak to your curriculum leader or Jon Curtis-Brignell.

Research & Development

As we transform and reshape the manner in which schools enable teachers to continue to learn, research and development occupies an increasingly central place in our school culture. By engaging with the theories and ideas of academic research, Tallis teachers can better understand the effectiveness of all that we do and feel a greater sense of empowerment as we reform pedagogy and grasp the mantle of professional knowledge creation.

Thomas Tallis School is committed to enabling practitioner research for all teaching staff, so that our collective professional capital is enhanced through the investigation and exploration of genuine questions that are centred on effective pedagogy and learning, thereby nurturing home-grown teacher-researchers who contribute to the growing body of knowledge that enables the profession to sustain itself.

Every year since 2014/15, every teacher at Thomas Tallis has built teacher-led systematic research into their everyday practice. The classic work by Carr and Kemmis (1986)⁶ describes research as being about:

- The improvement of practice;
- The improvement of the understanding of practice;
- The improvement of the situation in which the practice takes place.

Research is an activity associated with effective professional development, including as it does the types of activities which feature in successful professional development strategies, including:

- The use of specialist advisors and external experts
- Engagement in the analysis of and reflection around the underpinning rationale, evidence and relevant assessment data. This reflection and analysis is important for bringing about and embedding changes in practice.

⁶ Carr, W., and Kemmis, S. *Becoming Critical: Education Knowledge and Action Research*. Routledge, 1986.

- The exploration and challenging of teachers' own beliefs and assumptions
- Explicit discussions about how to translate content to the classroom;
- Teachers implementing what they have learned by experimenting in the classroom;
- Collaborative enquiry and structured peer support
- The opportunity to explore why things do and don't 'work'.

'All the research indicates that enquiry-orientated learning is not a quick-fix, but needs to be a sustained over time to ensure that learning (for both teachers and pupils) actually takes place'. ([BERA/RSA 2014: 25 - 27](#))⁷

To read the completed Action Research reports from previous years, please visit <https://www.thomastallisschool.com/staff.html>.

This year, all R&D projects must align with a specified focus as set out in the school plan. Accordingly, we would like all staff completing a Research & Development project this year to specify their preferred focus from the list below:

- Ethical Leadership (fairness and equality)
- Curriculum (curriculum design / powerful knowledge)
- Teaching (Pedagogy / independent learning / remote learning / teacher workload)
- Student achievement and progress
- Attendance and punctuality / Pupil premium / student voice / parental engagement
- Tackling Gender Injustice
- More Able Learners
- Literacy / vocabulary
- Personal development / Tallis Character / Community
- Practice-based research
- Post-16
- Behaviour for learning
- Decolonising the curriculum / anti-racism
- Inclusion / safeguarding / adaptive teaching
- Electronic devices
- Sustainability

Colleagues will have the option to submit one of the following as evidence of their R&D:

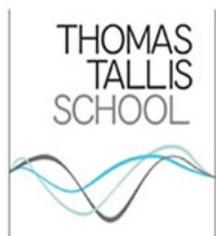

- 1500 word prose report
- poster (bullet points and images)
- Practice Based Research 'product' and brief evaluation

N.B. NQTs may opt into this process but it is not compulsory for them. NQTs are required to complete a separate programme of reflection as part of their induction.

⁷ BERA. Research and the teaching profession: building the capacity for a self-improving education system. BERA, 2014.

Every teacher is a researcher. We are committed to supporting them in sharing their understanding with the wider professional community for the benefit of all learners.

For further details about Research & Development, please visit our website [here](#), or contact Jon Curtis-Brignell or Jon Nicholls.

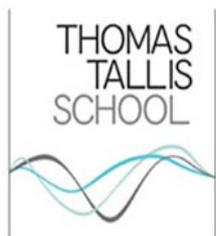

Appendix 1: The Trainee Teacher Programme (Schools Direct, PGCE, Teach First, Postgraduate Teaching Apprenticeship)

All Trainees at Tallis will have:

- a mentor in their subject area, who will also provide support and guidance through the procedures and expectations of the school;
- opportunities to work with other colleagues in their subject, planning collaboratively;
- regular feedback from colleagues;
- opportunities to attend training sessions being run by the school, including things for the wider community, such as BSL lessons;
- experience of a pastoral nature, including opportunities to go on trips and visits, when appropriate;
- 'settling in time' – observing colleagues and familiarising themselves with the school, including opportunities to pupil shadow and spend time in alternative provision;
- support with completing job applications and writing CVs;
- and Professional Studies sessions, co-ordinated by the Director of ITT.

All Trainees will be expected to:

- complete the tasks set by their training organisations on time;
- communicate effectively with their mentors, including seeking feedback and time with mentors;
- follow school procedures, for absences and setting of cover work;
- shadow pupils and observe colleagues as much as possible;
- plan lessons and show plans to the teacher whose classes they are taking;
- mark the work of the classes they teach, following department procedures and school expectations for marking and feedback;
- be attached to a tutor group and gain pastoral experience;
- and attend parents evenings/after school events, as directed by mentors.

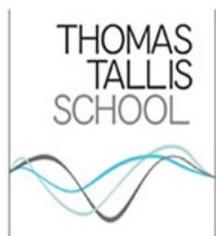

Appendix 2: The Newly Qualified Teacher Induction Programme

All NQTs at Tallis will have:

- their own mentor in their department area, who will also provide support and guidance through the procedures and expectations of the school;
- a 90% teaching timetable;
- opportunities to attend external training sessions;
- access to observe and work collegiately with more experienced colleagues;
- support and guidance for gathering evidence against the teaching standards;
- a dedicated, and sometimes personal, training programme delivered by a range of staff from different backgrounds;
- regular feedback from mentors and other colleagues;
- opportunities to be involved in planning and taking part in extra-curricular activities;
- a 'buddy' who is in their second year of teaching;
- opportunities to work in a pastoral role and support from experienced Heads of Year;
- and weekly training co-ordinated by the AST NQT Induction.

All NQTs will be expected to:

- track their progress to meeting the standards half termly, submitting this to the AST NQT Induction and their mentors;
- compile an evidence folder by the end of their induction year (either on paper or electronically);
- seek time and feedback with their mentors;
- participate within the wider school community (in a manageable way);
- contribute to the school community, through a pastoral role (usually as a co-tutor);
- attend NQT training sessions;
- and reflect upon their practice, setting themselves targets and aspirations.

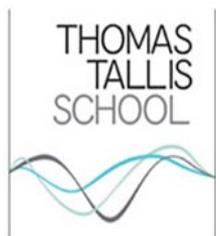

Appendix 3: Recently Qualified Teachers

All Recently Qualified Teachers will have:

- extra support systems in place, for when they may be needed;
- access to support and guidance towards meeting their Performance Management Targets;
- opportunities to work with outside groups as part of research projects;
- and further opportunities for professional development.

All Recently Qualified Teachers will be expected to:

- continue to contribute to the wider life and community of the school;
- 'Buddy' an NQT (when appropriate) – providing informal support and planning opportunities;
- devise performance management targets, in discussion with their appraiser;
- continue to reflect on their practice and seek opportunities to further develop subject knowledge and pedagogy;
- and contribute to the development of schemes of work – as directed by the Curriculum Leader.

Appendix 4: Colleagues Applying for Support for External Qualifications

We value learning very highly at Tallis. We would like to support colleagues who seek to improve their knowledge, skills and qualifications. We are, however, a public service and so we must :

1. Use public money for demonstrable public good
2. Offer a quality and undisturbed educational experience to our young people.

Therefore, when teachers are considering higher degrees or other professional qualifications and wish to seek time or financial support from school we will use the following questions:

1. Has the proposal been discussed with the relevant line leader and Deputy Head: Curriculum prior to application?
2. Are the aims and intentions of the course clearly identified?
3. Does the course match an identified need within the department's or school's plan?
4. Will the course link to an appraisal or action research target?
5. Does the proposed course of study have any adverse effect on the provision of education at TT?

If the above questions are answered satisfactorily we may agree to make a contribution to course fees up to a maximum of 50% of the total fees. Time will be negotiated according to the needs of the teacher's timetable. It is unlikely that time will be given except for the purposes of sitting external examinations.

Once a course is complete – or during its completion - we would expect teachers to lead a session for colleagues on the whole school or faculty implications of their work. This will be agreed with the AHT Teaching, Learning and Development.

This policy applies to teachers. Non-teaching colleagues' requests will be considered by the school Business Manager according to the school's business needs.
