30 March 2020

Dear Parents and Carers

Work for your child to be getting on with in preparation for their next steps

We hope that this letter finds you all safe and well.

We are writing to let you know that we have uploaded work on our Tallis Post 16 website under the tab: 'Students'. They need to click on further 'Reading & research lists':

<https://www.tallispost16.com/reading--research-lists.html>. We recommend that your child select 3 subjects they are interested in and link well with what they have applied for next year. Most subjects have set tasks for students to complete within the documents.

The reason why this work is so important is that the gap in knowledge and understanding between GCSE and A Level/ BTEC/ Apprenticeships is a significant one. In addition to that, through no fault of their own students have lost two months of study and the rigour of being able to sit their GCSE examinations. We want to ensure that they do not start their Post 16 studies at a disadvantage.

Please encourage your child to access the material online, and to check Insight regularly where some subjects have placed further learning for students to complete. This is the case with English, Maths and Science; all students need to engage with this work please.

If you have any queries regarding the work set please contact Ms Gallagher.

Yours sincerely

Jon Curtis-Brignell
Deputy Headteacher: Curriculum

Heather Odd
Head of KS4 Achievement
& Post 16 Admissions
